Services in excess of votes, Grahamstown-To Aroha railway, £65.

At the Police Court yesterday, Mr R. S. Bush, S.M., charging a first offender pleaded guilty to a charge of drunkenness and was convicted, cautioned and discharged.

Hudson was charged with driving a vehicle along Pollen street on the 3rd inst., between the hours of sunset and sunrise, without carrying lights. He pleaded guilty and was fined £1 and costs 2s.

At the Police Court yesterday, Mr R. S. Bush, S.M., charging a first offender pleaded guilty to a charge of drunkenness and was convicted, cautioned and discharged.

The Thames Navals.

A team from the No. 1 New Zealand Natives was to have arrived here on Friday night for the purpose of firing a friendly shooting match with the Thames Navals on Saturday, but in consequence of the unaccountable action of the authorities in Auckland in refusing to give the Natives' team the requisite ammunition, the trip had to be abandoned at the last moment.

The contest was looked forward to locally with considerable interest, as it would have been the first occasion on which a Natives rifle team had visited the Thames, and Capt. Potts and the officers of the Thames Navals made every possible arrangement to give the visitors a hearty reception and to entertain them upon a most liberal scale.

The function was to have been held in the Naval Hall, which had been very tastefully decorated for the occasion with nikau and ferns, while the company's colors—which were presented to the Navals in 1870 by the ladies of the Thames, and had never been out in public since the expedition to Parihaka until yesterday's church parade—were displayed, alongside of the Queen's colors. As, however, all arrangements for the supper had been completed, the members of the corps and the Band, together with a few friends, spent a convivial evening on Saturday night, the Chair being occupied by Capt. Potts, and the Vice-Chair by Lieutenant Sommerville.

When You Cannot Sleep.

So far as outside matters go a man can sleep almost anywhere. Habit settles it. A sailor sleeps in the fore-castle of a tumbling ship, and a soldier alongside of a big gun in a bombardment. One of the best nights' sleep I ever had was in the open air on a prairie in Western America, the grass for a bed, a blanket for a pillow, and my horse for company—the only living thing within fifty miles of me.

But, psaw! that was luxury compared with some situations in which men sleep sound as bricks in a wall. Habit does it as we said. Hence, Mr Fred Downes' loss of sleep had nothing to do with his being a commercial traveller. Commonly, these useful gentlemen can sleep wherever night overtakes them—in hotels or in trains, in quiet country towns or in the midst of a racket fit to drive anybody else fairly wild.

No, it was not outside, but inside matters that kept Mr Downes awake. He tells it this way: "In August, 1890, I found myself away below par, like many stocks and securities. I had no appetite, my stomach was cold and sour, and there was a nasty taste in my mouth that nearly made me sick. I tried eating light and simple food, but I had intense pain after it at the chest and sides, and between the shoulder-blades.

"Instead of sleeping, I rolled about the bed all night long. I felt really more tired and weary than a man does after a hard day's work." [At this point in Mr Downes' story we beg to insert the remark that the sense of fatigue or exhaustion is the result of a loss of strength; and that it makes no odds at all whether the strength has been used up in labor or has dwindled away through lack of nourishment. Pump the water out of a cistern, or let it leak out, it's gone just the same.]

"I got very weak," says Mr Downes, "and had great difficulty in following my business as commercial traveller. I tried medicines right and left, as anybody would, but none of them seemed to hit my case. In this way a year went by. At last I made up my mind to see if your remedy would help me. I had often heard it well spoken of; but never before had occasion to use it. I took it a few weeks and it did me a lot of good. My appetite improved, and my food agreed with me. For this good reason, I kept on with it and was soon as well as ever. It also cured my wife of indigestion from which she had suffered for years. (Signed) Fred Downes, The Rookeries, Bradford Road, Brighouse, Yorks, Dec. 28th, 1893."

Mr Samuel Dunn had the same trouble. We needn't repeat the general symptoms, as they were identical with those described by Mr Downes. Alluding to the effect on his nerves, Mr Dunn says that for eighteen months, dating from the spring of 1885, he did not know what it was to have sound natural sleep. On that, as we might expect, he grew so weak, he often had to leave his work for a day or two at a time. He took the usual assortment of drugs and medicines without getting any more good from them than Mr Downes had done. It was always that way. Medicines don't cure because they are medicines; they must be adapted to an understood disease; that's the common sense of it. "Finally," says Mr. Dunn, "I got so low that I felt I must have relief if I was to live much longer. In October, 1886, I began using Mother Seigel's Curative Syrup and in a few weeks I was well, and have been so ever since. But for the good luck that let me know of the Syrup I might have been dead before this. (Signed) Samuel Dunn, 2, Well field Street, Mill Lane, Warrington, December 29th, 1893."

We mustn't forget to say that Mr Downes was cured by the same remedy of the same complaint—indigestion and dyspepsia—and if there is anything on earth that murders sleep as that does, we haven't heard of it. If Mother Seigel's Curative Syrup had no other merit it would deserve the gratitude of mankind on account of its power (being no narcotic) to seal up aching eyelids and lock weary senses in forgetfulness.

A QUANTITY of jewellery, valued at £1,400, belonging to visitors, has been stolen from the Hotel Metropole, Folkestone. One lady lost £700 worth. It is believed that the robbery was carried out by the same gang by whom jewellery has recently been stolen at Sandgate, Deal and Hythe. It is estimated that jewellery to the value of nearly £2,000 has been stolen from hotels at these places. The robbery at the Hotel Metropole, Folkestone, proves to have been a very daring affair. The property, which belonged to three different families, was stolen from three suits of apartments on the second floor of the hotel.

The Klondyke Goldfield.

The steamer Portland, from St. Michael, reached San Francisco on September 5, with nearly two tons of gold belonging to the Bank of Commerce at Dawson, the Alaska Commercial Company, and 12 of the 240 passengers who came down on the vessel. Charles Anderson, a pioneer of the goldfields, who is perhaps the most wealthy miner in Dawson City, brought with him dust and nuggets valued at from 60,000dol. to 90,000dol. Anderson was the virtual discoverer of El Dorado Creek, but did only fairly well until recently, when he met with a wonderful piece of good fortune. During a spree he was induced to buy No. 29 on El Dorado, for 800dol. When he awoke in the morning after his good time and discovered a bill of sale for the claim, he felt that he had been virtually robbed, and attempted to secure his money from the men who had sold him the property, which he thought valueless. His efforts to recover his 800dol. proving of no avail, he began prospecting to see just how badly he had been bunked. To his surprise he panned out gold by the bucketful, and it is estimated that nearly 300,000dol. have been taken out of the despised claim. The original owners learned of the value of the property which they had been so ready to dispose of at a low figure, and sought to get it back from Anderson, but received the laugh which they had given the lucky Anderson at the time he had been induced to purchase the claim.

A partner of Anderson, John Lee, also came down on the steamer. He owns a goodly share of the treasure aboard. Just before the two men left Dawson they purchased a half interest in claim No. 30 on the El Dorado. For this interest they are said to have paid 208,000dol. Ed. Nelson, Wm. Young, and Charles Lamb are three other successful miners from the Minook and El Dorado districts. They, with Anderson and Lee, are about the only ones in the vessel having much gold, but besides them six or seven other passengers have perhaps 60,000dol. divided among them. About one hundred of the passengers are laborers and carpenters who have been working in Alaska.

It is claimed by the miners that there are about forty good claims around Dawson, and the others hardly pay the working. Minook, El Dorado, and nearly all the creeks are overrated. Circle City works steadily, and good strikes are being made near there. The great rush at present is to Kowukuk, which is about 150 miles from Fort Hamlin.

The opening of the Hauraki Rowing Club eventuated (on Saturday) afternoon, when there was a very fair number of members present.

Those taking part in the 'Cycling and Touring Club's grand concert on Wednesday, as requested to meet at the Academy of Music, this evening, at 7.30 o'clock for rehearsal. The concert promises to be a great success, as Mr Woodward, who has the arrangements in hand, has prepared a programme of exceptional excellence and the hall will doubtless be crowded.

Mr Kenner, S.M., is of opinion that the sale of revolvers should be prohibited except to persons with a permit from a Magistrate and, of course, the officers in the colonial forces. "No one but a fool or a criminal keeps a revolver in a civilized country," said Mr. Kenner.—Exchange.

"Mother, I am out of sorts."—He who uttered these words was a strongly-built young fellow, with clean-cut intelligent features, but a glauco was enough to show that he was run-down by work and worry; his head was heavy, his eyes looked bright, his nose was languid, and the fiend of indigestion had printed its marks upon his face. "My boy," replied the good and wise mother, "be advised this once by me; let me doctor you." The lad readily assented, and in a trice Holloway's world-famed Pills were produced. They soon did their work, and in a day or two the young fellow went about his work like a new man, filled with strength and energy.

A Case of CHRONIC INDIGESTION.

Terrible Fits of Biliousness. MANY DOCTORS FAIL, But CLEMENTS TONIC Provides a Complete Recovery. THE CASE OF MR. F. BRUNICARDI.

From the Freeman's Journal June 18, 1898. (BY OUR SPECIAL REPORTER.) WHEN our reporter called he found Mr. Brunicardi in the factory, 508 Harris-street, Ulm. He was engaged in artistically decorating a novel thing in cast picture frames, which he informed our reporter he had patented. On a shelf in the factory was plainly discernible a half-mutilated bottle of Clements Tonic.

"I was informed you are quite cured," questioned our reporter, pointing to the bottle. "So I am. I am thankful to say," replied he, "but I will reckon to take a dose of Clements Tonic now and then as a sort of preventive and to ward off any ill effects that might occur to me through the peculiar nature of my business. There is dust," continued Mr. Brunicardi, "floating in the air of this factory finer than the finest flour. It is so fine that it can't be seen with the naked eye, but it's there all the same, and goes freely into the lungs and stomach and even through the pores of the skin. The inhalation of this dust causes great irritation and a pain in the air passages, and sets up frequent fits of coughing which is very trying and distressing.

"I was informed you are quite cured," questioned our reporter, pointing to the bottle. "So I am.
